Summary

Sacramento Area Council of Governments (SACOG) initiated a new program, Mobility Zones, in December 2023 to prioritize and advance clean, shared, and active transportation investments in equity-priority communities across the six-county region (El Dorado, Placer, Sacramento, Yolo, Yuba and Sutter). Mobility Zones is funded by the US Department of Transportation's Rebuilding American Infrastructure with Sustainability and Equity (RAISE) program.

Mobility Zones is managed by staff from SACOG in partnership with Civic Thread and Steer. Civic Thread is interested in contracting with up to six (6) Community-Based Organization(s)/Engagement Lead for each of the six counties (El Dorado, Placer, Sacramento, Yolo, Yuba, and Sutter). As such, Civic Thread is requesting applications from interested Community Based Organization(s)/Engagement Lead(s) to aid in:

- **Executing a county-specific community engagement plan**
- **Identifying and engaging equity priority communities**
- **Planning, developing, and implementing county-specific engagement activities.**

Interested applicants should be able to demonstrate:

- a. A commitment to equity.
- b. A strong understanding of the county in which they intend to lead engagement efforts, particularly its diverse communities, language needs, and opportunities for engagement.
- c. Experience implementing equitable community engagement that centers on language justice, youth, older adults, and disinvested communities.
- d. A strong community network and the ability to engage community residents, neighborhood associations, faith-based communities, and the broader community.
- e. Understanding of mobility, connectivity, and/or transportation needs of the communities in the county in which they intend to lead engagement efforts in.
- f. Capacity to conduct at least 6-10 events in each phase of the engagement (12-20 events total).

Background

As the association of local governments and federally designated Metropolitan Planning Organization (MPO) for twenty-two cities and six-counties (El Dorado, Placer, Sacramento, Sutter, Yolo and Yuba), SACOG prepares the region's long-range transportation plan, approves the regional distribution of affordable housing, and assists in planning for transit, bicycle networks, clean air and airport land uses.

WALKSacramento dba Civic Thread is a non-profit organization that works to empower residents in institutionally underserved communities to achieve healthy built environments, has partnered with SACOG to lead the community engagement on Mobility Zones.

steer

The Steer team is comprised of experts across the mobility-planning spectrum, with thought leaders in equity and co-creation, data analysis and visualization, strategic decision making, active transportation and complete streets, urban design and placemaking, clean transportation and charging solutions, new mobility, funding and finance, and engineering/design capabilities.

Mobility Zones Project

The Mobility Zones Project aims to engage residents across the region in the co-creation of clean, shared, and active transportation infrastructure projects that address barriers to equitable mobility and reduce carbon emissions in locally designated “Mobility Zones” within SACOG’s region.

Through the Mobility Zones project, SACOG, Civic Thread, Steer, and the municipal, community, and technical advisors from across the region work to address mobility and safety challenges in historically disinvested communities in the six-county region. The Mobility Zones project centers around the co-creation of green transportation solutions by bringing together diverse public, private and community partners. This commitment to collaboration gives the Mobility Zones project a unique structure.

Project Management

While SACOG is the lead agency and the project manager for the RAISE grant and the contracts with Civic Thread and Steer, the work of the Mobility Zones project is jointly led by SACOG, Civic Thread, and Steer. The selected Community Based Organization(s)/Engagement Lead(s) will be under contract with Civic Thread and will directly report to Civic Thread staff. **The selected Community Based Organization(s)/Engagement Lead(s) will meet regularly with and receive direction from Civic Thread staff but will occasionally work directly with SACOG and Steer staff.**

Community and Stakeholder Engagement

Civic Thread is the lead for community and stakeholder engagement on the Mobility Zones project and is under contract with SACOG to provide these services. **The selected Community Based Organization(s)/Engagement Lead(s) will co-lead community and stakeholder engagement activities including but not limited to materials development, facilitation, and independently identifying and**

hosting county-wide community engagement activities for the county they are supporting. The selected consultant will operate independently with guidance from Civic Thread.

Advisory Committees and Project Task Force

To elevate community voices, the Mobility Zones project is guided by a structure of seven Advisory Committees and one Project Task Force. Five of the advisory committees are the Community Committees (one for each of the SACOG region's counties: Yolo, Sacramento, El Dorado, Placer, with Yuba and Sutter counties combined) with community leaders, community-based organizations, and a diverse cross-section of community members. In addition, there is one Municipal Advisory Committee with staff from the region's cities, counties, and regional transportation planning agencies. Lastly, the Technical Advisory Committee includes staff from related agencies, including transit operators, air districts, utilities, universities, and Caltrans. One representative from each Advisory Committee sits on the Project Task Force, which directs the progress of the project. Civic Thread and SACOG lead the staffing of the seven Advisory Committees and Project Task Force. **The selected Community Based Organization(s)/Engagement Lead(s) will be expected to attend Task Force and Community Advisory meetings for the county they are representing, as needed. Community Advisory and Task Force meetings occur each quarter, for up to sixteen meetings throughout the project – eight Community Advisory meetings and eight Task Force meetings.**
